TRADE POLICY TRENDS: CETA RATIFICATION

Eugene Beaulieu and Dylan Klemen

Negotiations between the Government of Canada and the European Union (EU) for the Comprehensive Economic and Trade Agreement (CETA) began in 2009 and the agreement came into force provisionally on September 21, 2017. Global Affairs Canada (GAC) lauds the agreement as “by far one of Canada’s most ambitious trade initiatives.” CETA is considered a modern and “progressive” trade agreement because it includes commitments to promote labour rights, environmental protection, and sustainable development.

Based on 2015 data, the EU is Canada’s second largest trading partner at 9 percent of goods trade with Canada just behind the US and just ahead of China. Meanwhile, Canada ranks as the 11th largest trading partner of the EU at 2 percent of EU goods trade. Moreover, in 2017, EU investment in Canada totalled $243.5 billion making it the second largest investor in Canada. CETA eliminated 98% of the EU’s tariff lines, whereas, prior to CETA, Canadian exporters faced tariffs on 25% of EU tariff lines. CETA also alters many other aspects of Canada-EU trade including rules of origin, customs and trade facilitation, regulatory harmonization, government procurement, services trade, and labour mobility. Finally, the agreement implements new investment rules.
PROVISIONAL RATIFICATION

CETA is a ‘mixed agreement,’ which means that, unlike other EU agreements, all individual EU states must ratify the agreement internally before the EU fully implements the deal. In practice, this means that most of the agreement came into affect when the Canadian and European Parliaments signed the agreement, but parts of the investment chapters are not implemented and will only be in force when each domestic EU legislative body ratifies the agreement. Specifically, the parts of CETA that are not yet implemented are investment provisions pertaining to financial services (specifically, portfolio investment, investment protection, and Investor State Dispute Settlement [ISDS]). This method of implementation hails from a decision by the Court of Justice of the European Union (CJEU) in 2017 that found that components of agreements pertaining to portfolio investment and ISDS require legislative approval from all EU legislatures in addition to the EP.

WHICH COUNTRIES HAVE RATIFIED CETA?

The following chart displays the EU countries that have ratified, and have not ratified, CETA (based on information from the European Council). The chart also displays the relative size of bilateral trade and investment relations with Canada. While the Canadian Parliament and EP have approved the deal, CETA will not come fully into force until the 28 legislative bodies of these states ratify CETA in line with their own constitutional procedures. Some of Canada’s largest trading partners in Europe such as Italy, and Germany, have yet to fully ratify the deal. Similarly, some countries with which Canada has the largest bilateral investment relations with (Netherlands, and Luxembourg) have yet to ratify CETA. Notably, Canada’s largest trading and investment partner in the EU, the UK, ratified the agreement on November 8, 2018.

**NOTE ON THE UK**

The UK is in the process of leaving the EU and is currently obliged to leave the EU on October 31, 2019, although this could be delayed. If they pull out of the EU without a deal with the EU, they will not be part of CETA. If a deal is reached, the UK could take part in CETA for up to two years. Failing this, it will be up to Canada and the UK to complete an FTA to maintain trading relations. Overall, the UK is Canada’s 2nd largest destination for Canadian foreign investment and 4th largest source of investment in Canada making it Canada’s largest bilateral investment relationship within the EU.
NEXT STEPS
Commentators have hailed Canada as a defender of the liberal world order in an increasingly protectionist world. In this vein, Canada is actively pursuing various trade agreements. Although the EU will more than likely ratify CETA, whoever wins the upcoming federal election on October 21st will have to contend with opposition to trade agreements like the opposition seen during the process of ratifying CETA (which was significant). If a hard Brexit happens this diminishes the importance and impact of CETA for Canada. In this case, the Canadian government should be prepared to finalize a trade and investment agreement with the UK. Canada should also encourage its European economic partners to ratify CETA.

About the Author

Eugene Beaulieu

Dr. Beaulieu (PhD, Columbia, 1997) is a Professor in the Department of Economics at the University of Calgary and the Program Director, International Economics at The School of Public Policy. Before pursuing a doctorate at Columbia he worked as an economist for the Government of Kenya and the Bank of Canada. Dr. Beaulieu publishes widely in economics and public policy journals and his principal area of research is empirical international economics, with a focus on trade policy, foreign investment, firm dynamics, labour markets and income inequality. He works broadly in the areas of public policy, political economy and economic development. Dr. Beaulieu has held several research grants and awards including the Petro-Canada Young Innovators Award, a Killam Resident Fellowship, and held the Norman Robertson Fellowship at the Canadian foreign affairs office.

Dylan Klemen

Dylan Klemen is a Research Associate with the International Policy and Trade division at The School of Public Policy (SPP). Prior to joining the SPP, he completed an internship with the U.S. Consulate General in Calgary working for the U.S. Commercial Service. Dylan has a Masters of Public Policy from the University of Calgary and a Bachelor of Arts (with distinction) in Political Science and Philosophy from the University of Alberta.
ABOUT THE SCHOOL OF PUBLIC POLICY

The School of Public Policy has become the flagship school of its kind in Canada by providing a practical, global and focused perspective on public policy analysis and practice in areas of energy and environmental policy, international policy and economic and social policy that is unique in Canada.

The mission of The School of Public Policy is to strengthen Canada's public service, institutions and economic performance for the betterment of our families, communities and country. We do this by:

• **Building capacity in Government** through the formal training of public servants in degree and non-degree programs, giving the people charged with making public policy work for Canada the hands-on expertise to represent our vital interests both here and abroad;

• **Improving Public Policy Discourse outside Government** through executive and strategic assessment programs, building a stronger understanding of what makes public policy work for those outside of the public sector and helps everyday Canadians make informed decisions on the politics that will shape their futures;

• **Providing a Global Perspective on Public Policy Research** through international collaborations, education, and community outreach programs, bringing global best practices to bear on Canadian public policy, resulting in decisions that benefit all people for the long term, not a few people for the short term.

The School of Public Policy relies on industry experts and practitioners, as well as academics, to conduct research in their areas of expertise. Using experts and practitioners is what makes our research especially relevant and applicable. Authors may produce research in an area which they have a personal or professional stake. That is why The School subjects all Research Papers to a double anonymous peer review. Then, once reviewers comments have been reflected, the work is reviewed again by one of our Scientific Directors to ensure the accuracy and validity of analysis and data.
